

FILTRATION AND CONDITION MONITORING SYSTEMS

Filtration systems

We provide a wide range of filtration systems for hydraulic, fuel and lube oil applications. These include high, medium and low pressure filters, return line filters, offline filters, bypass filters, spin-on filters and mobile systems.

Replacement elements

We provide replacement elements suitable for

- Boll & Kirch
- Donaldson
- Internormen
- Mahle
- MANN-FILTER
- Parker
- Vokes

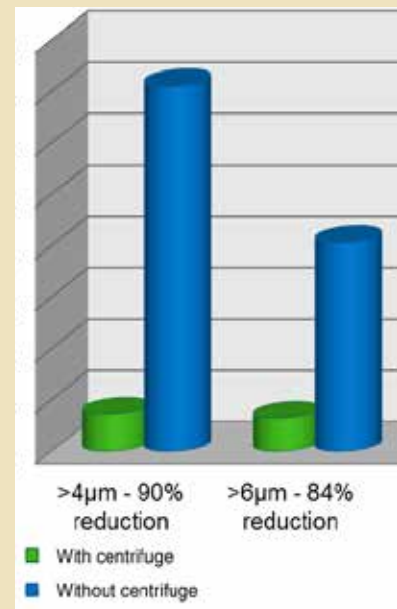

MANN+HUMMEL lube oil centrifuges

These products clean oil by generating centrifugal force 2000 times greater than gravity, removing high density, sub-micron particles. This can extend the lifespan of both the main lube oil filter cartridge as well as the lube oil.

The benefits:

- easy retrofit
- quick and simple to maintain
- reduced downtime
- reduced engine wear
- reduced waste disposal costs
- reduced maintenance costs
- cleaner oil, extending oil life and increasing efficiency
- longer service intervals
- quick return on investment

Particle reduction in the lube oil

Simplex-Turbulo is a Marine Master Distributor for Parker Kittiwake with responsibility for the marine and power generation industries. We offer a range of fuel, lube oil and water testing equipment.

Marine fluids testing equipment

These products offer an efficient and cost-effective method for meeting your various fluid analysis needs. They include:

- fuel drip bunker samplers
- fuel samplers
- bottle samplers
- lube oil BN and water in oil test kits
- flashpoint detectors
- cloudpoint detectors
- viscosity meters
- fuel density meters
- fuel compatibility testers
- purpose built storage for bunker sampler kits

Condition monitoring and testing equipment

Parker have an extensive range of easy to use testing and condition monitoring equipment, including:

- FTIR₃ oil analyser
- cylinder liner cold corrosion test kits
- lube oil viscometer tester
- condition monitoring equipment for thrusters
- vibration monitoring and analysis equipment
- portable purifier for hydraulic oil
